1. a. Possessing the property (first observed in amber) of developing electricity when excited by friction or by other means.

Originally the word had reference only to the property of attracting light bodies, even the phenomenon of electrical repulsion being a later discovery (Gilbert indeed mentions the non-existence of such a phenomenon as an evidence of a distinction between magnetism and electricity).

Except in the phrases in b, ELECTRICAL *a.* is now more usual in this sense. In some cases the choice between the two adjs. is somewhat arbitrarily restricted by usage: thus we usually say 'an *electrical* machine', but 'an *electric* battery'.

electricity (ɪːlɛk-, ɛlɛk'trɪsɪtɪ). [f. ELECTRIC + -ITY.]

1. In early use, the distinctive property of 'electric bodies', like amber, glass, etc., *i.e.*, their power when excited by friction to attract light bodies placed near them; also, the state of excitation produced in such bodies by friction. Subsequently the name was given to the cause of this phenomenon and of many others which were discovered to be of common origin with it, *e.g.* the electric spark, lightning, the galvanic current, etc. Franklin considered electric phenomena to be due to a subtle fluid diffused through all bodies, the excess of which above its normal quantity constituted 'positive electricity', and its deficiency below the normal quantity 'negative electricity'; but he also used 'electricity' as a name for the fluid itself. Others believed 'positive' and 'negative' electricity to be two distinct fluids, which when combined neutralized each other. Before the formulation of the present theory of atomic structure (see note to ATOM *sb.* 1), the prevailing view was that electricity is 'a peculiar condition either of the molecules of the electrified body or of the ether which surrounds them' (*Syd. Soc. Lex.*). The term 'electric fluid' survived for some time in popular language, and the names 'positive' and 'negative' electricity (also an inheritance from Franklin's theory) are still retained in scientific use.

Electricity may be developed by any means that produces disturbance of the molecular condition of bodies: by friction (***frictional electricity***), by chemical action (***galvanic electricity***), by heat (***thermal electricity***), by magnetism (***magnetic electricity***). Occasionally *electricity* and its related adjs. are used in a narrower sense with reference to the electricity produced by friction, as distinguished from galvanism or from magnetic or thermal electricity.

2. The name given about 1845 to a form of 'animal magnetism' or hypnotism, in which unconsciousness was induced by causing the patient to gaze steadily at a small bright object.

Originally the object used was a disc of zinc and copper, the galvanic action of which was supposed to be concerned in producing the result; hence perhaps the name, which however was employed by some writers as a synonym for 'animal magnetism' in general, with reference to its imagined relation to vital electricity.

Gr. ἐλέφας (gen. ἐλέφαντος). The refashioning of the word after Lat. seems to have taken place earlier in Eng. than in Fr., the Fr. forms with *el-* being cited only from 15th c.

Of the ultimate etymology nothing is really known. As the Gr. word is found (though only in sense 'ivory') in Homer and Hesiod, it seems unlikely that it can be, as some have supposed, of Indian origin. The resemblance in sound to Heb. *eleph* 'ox' has given rise to a suggestion of derivation from some Phœnician or Punic compound of that word; others have conjectured that the word may be African. See Yule *Hobson-Jobson* Suppl., s.v. For the possible relation to this word of the Teut. and Slavonic name for 'camel', see OLFEND. The origin of the corrupt Romanic forms with *ol-* is unknown, but they may be compared with L. *oleum*, *olīva*, ad. Gr. ἔλαιον, ἐλαία.]

(The mod.G. *elf* is believed to be adopted from Eng.; MHG. had *elbe* a female elf.)

Some have compared the Teut. word with the Skr. *ṛbhu*, the name given to the three genii of the seasons in Hindu mythology.]

1. *Mythol.* a. The name of a class of supernatural beings, in early Teutonic belief supposed to possess formidable magical powers, exercised variously for the benefit or the injury of mankind.

They were believed to be of dwarfish form, to produce diseases of various kinds, to act as *incubi* and *succubi*, to cause nightmares, and to steal children, substituting changelings in their place. The Teutonic belief in elves is probably the main source of the mediæval superstition respecting fairies, which, however, includes elements not of Teutonic origin; in general the Romanic word denotes a being of less terrible and more playful character than the 'elf' as originally conceived. In mod. literature, *elf* is a mere synonym of FAIRY, which has to a great extent superseded it even in dialects. Originally *elf* was masculine, ELVEN feminine; but in 13th and 14th c. the two seem to have been used indifferently of both sexes. In mod. use *elf* chiefly, though not always, denotes a male fairy.

else (ɛls), *adv.* Forms: 1-6 elles, (2 helles, *Orm.* elless, 3-4 ? el(le, 4 eles), 4 ellez, 4-5 ellus, 4-6

ellis, -ys, (4 hellis), 4–7 ells, els, 6– else. [OE. *elles* = OHG. *elles*, *alles*, OSw. *äljes* (Sw. *eljest*), adverbial use of the genit. case neuter (= Goth. *aljis*:— OTeut. **aljeso*) of OTeut. **aljo-* other (whence OE. *el-* in compounds: see ELELENDISH) = L. *alius*.

Senses 1 and 2 appear to arise from phrases in which the word retained its original force as an adj. used absol.; senses 3–5 are prob. strictly adverbial genitives.]

1. a. A synonym of *other*, used in connexion with indef., rel., or interrog. pronouns, or with words or phrases equivalent to any of these, such as *anything*, *nothing*, *everything*, *anybody*, *some one*; also with *all* (absol.), *much*, *little*, *a great deal*. (In mod. language *else* follows the pronominal word or phrase.) In this use *else*, like its synonym *other*, admits contextually of two different interpretations: e.g. *something else* may mean 'something in addition' to what is mentioned, or 'something as an alternative or a substitute'. In the former case *else* may be replaced by *besides*, *further*, *more*; in the latter case it may sometimes be rendered by *different*, *instead*, *with that exception*, etc. Often (like *other*) followed by *but* (see BUT 5 b.) or *than*.

In OE. *elles*, as thus used, admits of being construed, in accordance with its etymology, as a neut. adj. in gen. case; e.g. *áwiht elles* (aught else) is lit. 'aught of other', cf. *áwuht gódes* (*Metr. Boeth.* xxv. 59) lit. 'anything of good'; also Lat. *quid novi*, *amari aliquid*, Fr. *quelquechose de bon*. The extension of this construction seen in phrases like *anyone else*, *who else*, etc., and in the examples under 1 b, may be compared with Fr. *il n'y a personne de blessé*; *voilà trois hommes de mort*, etc. It is however probable that even in OE. the consciousness of the genitival character of *else* was already obscured; and from the standpoint of mod. usage, it is hard to say whether the word should be regarded as an adj. in concord with the words that from the point of view of historical grammar would be said to 'govern' it, or whether it should be classed as an adverb.

It seems however not wholly impossible that the word may have been due to popular etymology working upon some Vulgar Lat. corruption of *quatuor tempora*; cf. The English name of the four periods of fasting and prayer (L. *quatuor tempora*) appointed by the Church to be observed respectively in the four seasons of the year. Each of these fasts occupies three days, viz. a Wednesday and the following Friday and Saturday; these are called *Ember days*, and the weeks in which they occur are called *Ember weeks*. Since the Council of Placentia A.D. 1095, the Ember days have been the Wednesday, Friday, and Saturday next following (1) the first Sunday in Lent, (2) Whitsunday, (3) Holy Cross Day, 14 Sept., (4) St. Lucia's Day, 13 Dec. In the Roman Church the Ember-Saturdays, and in the Church of England the Sundays immediately following, are the days on which ordinations usually take place.

B. *sb. Bot.* An embryonic plant developed in a culture medium from a single cell.

1964 I. K. VASIL et al. in *Plant Physiol.* XXXIX. (Suppl.) p. lxiii/2 The tissue first formed a free suspension of cells and cell groups. Gradually many small round masses of tissue, designated here as embryoids, were formed by further cell division. The embryoids produced roots at one end and then typical..leafy structures at the other end giving rise to normal-looking plantlets. Originating from single cells various stages of embryoid formation were seen in the liquid medium. **1971** *New Scientist* 29 Apr. 263 (*caption*) These cells are then cultured, and from them are grown embryoids and eventually whole 'pomatoes'. **1980** *Nature* 27 Mar. 341/2 We report here a repeatable precocious flowering of embryoids derived from mature ginseng root callus cultured in a chemically defined medium. **1983** *New Scientist* 26 May 555/3 We have been altering the concentrations of growth regulator to try to stimulate the callus to form so-called somatic embryos or embryoids. These embryoids are analogous to the normal embryos in the seed but contain only genetic material from the single parent—that is, they are clonal.

†**7.** ***emergent year***: transl. of med.L. *annus emergens. Obs.*

The term was used by Gervase of Tilbury, who says that the Jews have three modes of reckoning their years: viz., *annum usualem*, which they employ in conformity with the practice of their Christian neighbours, beginning on 1 Jan.; *annum legitimum*, which begins in April; and *annum emergentem*, which is reckoned from their departure from Egypt. In this passage *emergens* has its usual med.L. sense 'arising out of a particular circumstance' (cf. 4, 5); but after the publication of Gervase in Leibnitz *Script. Rer. Brunsv.* (1707-10) the phrase *annus emergens* was taken to mean 'the initial year of an era' (a misconception to which the sentence, apart from its context, easily lends itself). Hence the modern equivalents of the L. phrase, with this incorrect explanation, found their way into 18th c. dictionaries of Fr., Sp., and Eng.; but we have failed to discover any evidence that they actually came into use in those langs. A passage from the same ultimate source as that in Gervase occurs in Higden (see quot. 1450).

H. Lewes's term, 'emergent', as contrasted with resultant. **1959** *Listener* 8 Jan. 58/1 When Alexander speaks of 'emergents' he sometimes means qualities which some psychologists nowadays would call the *Gestalt* properties of ordered systems..but sometimes he means something more like the possibility of a new way of *functioning* released through a particular kind of ordered structure.

emperor ('ɛmpərə(r)). Forms: 3 emperere, 3–8 emperour(e, (3 amperur, aumperour, 4 emparour, -ur, empere, emperore, -ure, eemperour, 5 emperowre), 5–6 emproure, -ure, (6 emporour, empowr, empoure, -pre-, -prioure), (4 imparour, -ur, imperur, -owr, 4–6 imperour), 4, 6– emperor. [The ME. *emperere*, *emperoure*, are respectively ad. OF. *emperere*(*s* (nom. case) and *empereor* (oblique case):—L. *impe'rātor*, *imperā'tōrem*, agent-noun f. *imperāre* to command.

The L. *imperator*, orig. denoting in general the holder of a chief military command, became in the period of the Roman republic a title of honour, bestowed on a victorious general by the acclamation of the army on the field of battle. This title was afterwards conferred by the senate on Julius Cæsar and on Augustus, with reference to the military powers with which the chief of the state was invested; and in accordance with this precedent it was adopted by all the subsequent rulers of the empire except Tiberius and Claudius. In post-classical Latin it became the chief official designation of the sovereign, being interpreted in the sense of 'absolute ruler' (in Greek *αὐτοκράτωρ*). In this sense it continued to be applied to the rulers of the Western and Eastern Roman empires until they severally came to an end. In A.D. 800 when the Western empire was nominally revived, the Frankish king Charles the Great (Charlemagne) was crowned by the pope with the title of *imperator*, implying that he was invested with the same supremacy over European monarchs that the rulers of the earlier Roman empire had possessed. The title continued to be borne by his successors, the heads of the 'Holy Roman Empire' (popularly the 'Empire of Germany') down to its extinction in 1806. The Romanic (and hence the English) forms of the word were originally applied to the sovereigns of the Eastern empire, to those of the Romano-Germanic empire, and historically to those of the earlier Roman empire. For subsequent extensions of meaning (common to English with the Romanic langs.), see below in sense 3.]

I. 1. The sovereign of the undivided Roman Empire, or of the Western or Eastern Empire.

3. a. In wider sense, as a title of sovereignty considered superior in dignity to that of 'king'.

In the Middle Ages, and subsequently, the title was often applied to extra-European monarchs ruling over wide territories. We still speak of the Emperors of China, Japan, Morocco, and historically of the Mogul Emperors of India and the Emperor of the Aztecs. Since the early part of the 16th c. the title has been used as the equivalent of the Russian TZAR (or *czar*). The Sultans of Turkey (who assumed the style of *Keisar-i-Rūm*, 'Cæsar of Rome', as successors of the Byzantine emperors) were occasionally spoken of as emperors. Until the present century 'the Emperor' always, unless otherwise interpreted by the context, denoted the 'emperor of Germany'. But in 1804 Napoleon I. assumed the title of 'Emperor of the French'; and in the same year the emperor Francis II 'of Germany' added to his other titles that of 'Emperor of Austria', which he retained when in 1806 he put an end to the Holy Roman Empire by his abdication. Subsequently the style of emperor has been adopted in several other instances. 'At present (1889) the only sovereigns so called are (apart from Asiatic and African potentates) those of Russia, Austria, Germany (since 1870), and Brazil (since 1822); and in 1876 the title of Empress of India was assumed by Queen Victoria.' en, early ME. variant of IN.

en-, *prefix*[1], the form assumed in Fr. (as also in Pr., Sp., Pg.) by the L. prepositional prefix *in-* (see IN-). The Eng. words in which it appears are partly adaptations of Fr. (occasionally Sp.) words, either of L. descent or formed in Romanic, and partly original formations upon Eng. words.

A. Forms.

1. In modern orthography and pronunciation *en-* becomes *em-* before *b* and *p*, and occasionally before *m*. This rule was not fully established in spelling before the 17th c.; in ME., as in OF. and OSp., *enb-*, *enp-* are more frequent than *emb-*, *emp-*, though the latter may perhaps represent what was the actual pronunciation.

2. In ME. (as in OF.) *en-*, *em-*, freq. became *an-*, *am-* (a form which survives in AMBUSH). This *an-*, *am-*, like the native prefix AN- 1, was often reduced to *a-*: see APPAIR, APRISE. Conversely, the prefix *a-* of various origin was often changed into *en-*, as in *embraid*.

3. From 14th c. onwards the prefix IN- (IM-) has been frequently substituted for *en-* (*em-*); and, conversely, *en-* (*em-*) has been substituted for the prefix IN- (IM-) of words of L. or It. origin, and for the native Eng. IN-. Nearly every word, of long standing in the language, which is formed with *en-* has at some period been written also with *in-*. Hence it is often impossible to determine whether in a particular word of Eng. formation the prefix *en-* or *in-* is due to the analogy of words of Fr., Lat., or purely Eng. origin; in many instances it must have been applied merely as a recognized Eng. formative, without reference to the analogy of any individual word. In 17th c. the form *in-* (*im-*) was generally preferred; the now prevailing tendency is to use *en-* (*em-*) in Eng. formations, and where the prefix represents Fr. *en-*; and in mod. reprints of 17th c. books, and in Dicts., the *in-* (*im-*) of the original texts is often replaced by *en-* (*em-*). In some words, however, as *em-*, *imbed*, *en-*, *inclose*, the form with *in-* still occurs, but in most cases less frequently than the *en-* forms; in a few instances *in-* has entirely superseded *en-*, even where the latter is etymologically more correct, as in *imbrue*, *impair*, *inquest*. In a few words (*e.g.* ENSURE, INSURE) the alternative forms have (in very modern times) been appropriated to express different senses. As a general rule the *en-* and *in-* forms are in this Dict. treated as belonging to one and the same word. A word still surviving in use is treated in the alphabetical place of its now more frequent form. In the case of obs. words, where there is no decided preponderance in usage, the choice of the typical form has been determined by etymological considerations: thus the adapted words from Fr. or Sp. with *en-*, and new formations app. on the analogy of these, are by preference placed under E; while words app. formed on Latin analogies, or prob. originating as compounds of the Eng. prep. IN, will appear under I.

The substitution of *in-* for *en-* has in part been due to notions of etymological fitness, the Romanic *en-* having been regarded as a corrupt and improper form of the L. *in-*, while the Eng. formations in *en-* were either referred to L. analogies or treated as compounds of the native preposition. The phenomenon seems, however, to be partly of phonetic origin. The sound of (ɛ) initial and unstressed has in careless speech a tendency to pass into (ɪ); cf. the colloq. pronunciation of *effect*, *ellipse*, *essential*. Hence such forms as *embed*, *imbed*, *enclose*, *inclose* are in familiar pronunciation really homophones; many persons use the *en-* forms in writing, and (unconsciously) the *in-* forms in speech. From the occurrence of spellings like *inbassed* for *embassade* in the fourteenth century, it may be surmised that the tendency to 'raise' the initial (ɛ) has existed from an early period.

B. Signification and uses.

The applications of the prefix in Fr. (Pr., Sp., Pg.), and hence in Eng., are substantially identical with those of the L. *in-*, which was used to form vbs. (1) from sbs., with sense 'to put (something) into or on what is denoted by the sb.', or 'to put' what is denoted by the sb. 'into or on (something)'; (2) from sbs. or adjs., with sense 'to bring or to come into a certain condition or state, to invest with a certain quality'; (3) from other vbs., with added notion of 'within', 'into', 'upon', or 'against', or with merely intensive force. Many L. or late L. words of this formation came down into Romanic, and have thence been adapted in Eng. In Romanic the prefix was extensively applied in the formation of new words, in strict accordance with L. analogies, exc. that in formations upon vbs. the notion of 'against' rarely or never occurs. In Eng. the analogy of the many words with *en-* adapted from Romanic gave rise to the extensive application of the prefix in the formation of Eng. words, its functions being the same as in Fr.

The compounds of EN- which have been in general use, or which require special comment, are given in their alphabetical place. The following are examples of those which are merely nonce-words, or of very rare occurrence. (See also EM-).

en-, *prefix*[2]. The form taken by the Gr. ἐν, etymologically cogn. with the prec. Chiefly in combinations already formed in Greek, as *enallage*, *endemic*, *energy*, *enthusiasm*; occas. in mod. formations as *enderon*. (Before *b*, *m*, *p*, *ph*, it takes the form *em-*; and before *l*, *r* it becomes *el*, *er-* respectively.)

-en, *suffix*[1] :—OTeut. *-îno(m*, formally the neut. of *-îno-*, -EN[4], is used to form diminutives from sbs. (esp. names of animals), as in CHICKEN *sb.*[1], KITTEN, MAIDEN, ME. *ticchen* kid; also in ME. *stucchen* small piece.

-en, *suffix*[2] :—WGer. *-innja*, repr. OTeut. *-inî*, occurs in several OE. fem. sbs., a few of which have survived into mod. Eng.

1. It is used to form feminines from sbs. denoting male persons or animals, as in OE. *gyden* goddess (f. *god*), *mynecen* nun (f. *munuc* monk), *wylfen* she-wolf (f. *wulf* wolf). The only surviving instance of this use is VIXEN female fox. 2. It is added in a few instances to the stem of a vb. or to that of a verbal-abstract sb., as in BURDEN *sb.*, BURIAN, OE. *ræden* condition.

-en, *suffix*[3], the form assumed in ME. by the OE. *-an*, the termination of the nom., accus., and dat. plural of sbs. of the weak declension, as in *oxa* masc., ox, pl. *oxan*; *tunge* fem., tongue, pl. *tungan*; *éare* neut., ear, pl. *éaran*. In origin the suffix belonged to the stem; but as in OE. the nom. sing. of these sbs. ended in *-a*, *-e* (levelled in ME. to *-e*), while the OE. *-an* of the oblique cases sing. became *-e* in ME., the termination *-en* came to be regarded as a formative of the plural, and its use was extended in southern ME. to many other words of OE. and Fr. origin. It was also added to the remains of other old plurals, as *brether*, *childer* (OE. *cildru*), *ky* (OE. *cý*), whence the modern *brethren*, *children*, *kine*. Apart from these the sole surviving representative (in standard Eng.) of this inflexion is *ox-en*; but *hos-en* (OE. *hosan*) continued in use until 17th c. In southern and south midland dialects the plurals in *-en* are still of frequent occurrence.

-en, *suffix*[4] (reduced to *-n* after *r* in unstressed syllables), corresponds to OS. *-in*, OHG. *-în* (Ger. *-en*), ON. *-in*, Goth. *-eina-*:—OTeut *-īno-*, = Gr. *-īvo-*, L. *-īno-* (see -INE), added to noun-stems to form adjs. with sense 'pertaining to, of the nature of'. In Teut. the adjs. so formed chiefly indicate the material of which a thing is composed. Of the many words of this formation which existed in OE. scarcely any survive in mod. use; but the suffix was extensively applied in ME. to form new derivatives. Some of these took the place of OE. words, from which they formally differ only by the absence of umlaut; compare OE. *gylden* with mod.Eng. *golden*, OE. *stǽnen* (early ME. *stenen*) with ME. and dial. *stonen*, made of stone. From 16th c. onwards there has been in literary English a growing tendency to discard these adjs. for the attrib. use of the sb., as in 'a gold watch'; hence many of them have become wholly obs., and others (as *golden*, *silvern*) are seldom used except metaphorically, or with rhetorical emphasis. It is only in a few cases (e.g. *wooden*, *woollen*, *earthen*, *wheaten*) that these words are still familiarly used in their lit. sense. In s.w. dialects, however, the suffix is of common occurrence, being added without restriction to all sbs. denoting the material of which anything is composed, as in *glassen*, *steelen*, *tinnen*, *papern*, etc.

-en, *suffix*[5], forming verbs.

1. from adjs., as *darken*, *deepen*, *harden*, *madden*, *moisten*, *widen*. Most of the words of this type seem to have been formed in late ME. or early mod.Eng., on the analogy of a few verbs which came down from OE. or were adopted from ON.; e.g. *fasten*:—OE. *fæstnian*; *?brighten*:—ONorthumb. *berhtnia*; *harden*:—ON. *harðna*. In Teut. there are two classes of vbs. formed upon the 'weak' or lengthened stems of adjs. (suffix *-on-*): (*a*) the intransitive (or in sense pass.) vbs. which in Goth. make the inf. in *-nan*, and the pa. t. in *-ôda*; e.g. *fullnan* to be filled, f. *fullan-* full; *gabignan* to be rich, f. *gabigan-* rich; *managnan* to abound, f. *managan-* many; (*b*) the originally trans. vbs. in OTeut. (*i*)*nôjan*, e.g. OHG. *festinôn* to fasten, f. *feston-* (:—*fastjon-*) fast. In Eng. these two classes of vbs. can scarcely be discriminated with precision, but in most cases the intr. sense (as in *deepen* = 'become deeper') appears to be derived from the trans. sense (as in *deepen* = 'make deeper').

2. from sbs. In OTeut. sbs. both of the weak and the strong declension gave rise to intr. verbs in *-(i)nôjan*, and this formation is represented by a few examples in OE., such as *hlystnian* to LISTEN. In 14th c. some additional vbs. occur, formed app. on the analogy of these, as *happen*, *threaten*. The majority of Eng. words f. sb. + *-en*, however, such as *heighten*, *lengthen*, *strengthen*, *hearten*, *barken*, appear first in mod.Eng., and seem to be due to the analogy of the verbs f. adjs.

3. In one or two cases (e.g. *waken*) the suffix *-en* represents OTeut. *-na-*, the formative of the present stem in certain strong verbs.

-en, *suffix*[6], the ending of the past participle of many strong verbs, as *broken*, *spoken*, *sunken*. OE. *-en*, corresp. to OFris, *-en*, OS. *-an*, (M)Du. *-en*, OHG. *-an* (MHG., G. *-en*), ON. *-enn*, *-inn* (Sw. *-en*), Goth. *-ans*:—prim. Germ. *-inaz*, *-anaz* (Indo-Eur. *-énos*, *-ónos*), of which some languages generalized one and some the other, the first type being represented by mutated forms in OE., eg. *cymen* (:—**kuminaz*), pa. pple. of *cuman* to COME, beside *cumen* (:—**kumanaz-*).

enanthem (ɛ'nænθəm). *Path.* [Anglicized form of next or a. G. *enanthem.*] = next.

1885 C. H. FAGGE *Princ. & Pract. Med.* I. 170 He seems to have thought that an important argument.. could be based upon an analogy which he drew between the specific cutaneous eruption of a contagious fever and the lesions in this disease [*sc.* enteric fever] which affect Peyer's patches and the solitary follicles. To express this very relation, the word *enanthem* had been already coined by German writers as a correlative to the term *exanthem.* **1962** *Lancet* 12 May 997/1 This is an atypical history [of smallpox]—the rash developing on the first day of fever and illness. There was a well-marked enanthem, and between 5000 and 10,000 lesions on the skin. *Ibid.* 999/1 The enanthem varied from one or two lesions on the palate to a severe eruption all over the palate and fauces.

enanthema (ɛnæn'θi:mə). *Path.* [mod.L., ad. Gr. *ἐνάνθημα* eruption.] A mucosal, as opposed to a cutaneous, eruption.

Bot.* (ed. 5) 347 We have already observed, that the radicle as a general character is turned towards the micropyle... Some apparent exceptions to these relative positions occur.. when the radicle is described as enantioblastic.

enantiodromia (ɛn,æntɪəʊ'drəʊmɪə). [a. Gr. *ἐναντιοδρομία* running in contrary ways, f. *ἐναντίος* opposite + *δρόμος* running.] The process by which something becomes its opposite, and the subsequent interaction of the two: applied esp. to the adoption by an individual or by a community, etc., of a set of beliefs, etc., opposite to those held at an earlier stage. Hence **enantio'dromiacal, enantio'dromic** *adjs.*, resulting from enantiodromia.

1917 D. HECHT in C. E. Long tr. *Jung's Coll. Papers Anal. Psychol.* (ed. 2) xiv. 415 Heraclitus.. discovered the most wonderful of all psychological laws, namely, the regulating function of antithesis. He termed this 'enantiodromia' (clashing together), by which he meant that at some time everything meets with its opposite. *Ibid.* 417 Enantiodromia is the being torn asunder into the pairs of opposites. **1923** H. G. BAYNES tr. *Jung's Psychol. Types* xi. 542, I use the term enantiodromia to describe the emergence of the unconscious opposite... A good example of enantiodromia is seen in the psychology of Saul of Tarsus and his conversion to Christianity. **1943** E. L. MASCALL *He who Is* x. 128 Islam is submission... And by that *enantiodromia,* which is so marked a feature of human activity, Mohammedanism becomes the most militant religion in history, for once the believer has made his submission he.. sees himself as an instrument of the divine ruthlessness. **1946** *Brit. Jrnl. Med. Psychol.* XX. 214/1 Just as the repressions that went with the increasing dogmatism and formalism of the Middle Ages had produced the enantiodromiacal reaction of the Renaissance, so the repressions of the age of materialism and respectability produced its deadly challenge out of itself. **1953** *Times Lit. enantiomorph (ɛn'æntɪəʊmɔ:f). [a. G. *enantiomorph* (C. F. Naumann *Elemente d. theoretischen Krystallogr.* (1856) II. ii. 104), f. Gr. *ἐναντίος* opposite + *μορφή* form.] A form which is related to another as an object is related to its image in a mirror; a mirror image. Also *adj.* = **enantio'morphic, -'morphous** *adjs.*; whence **-'morphously** *adv.* So **enantio-'morphism, enantio'morphy,** the condition or property of being enantiomorphous, esp. in *Cryst.*

1885 A. C. BROWN in *Encycl. Brit.* XIX. 312/1 Two figures or two portions of matter are said to be enantiomorph to each other when these forms are not superposable, i.e., the one will not fit into a mould which fits the other, but the one is identical in form with the mirror image of the other. *Ibid.,* As an example of enantiomorphism we may take our two hands, which will not fit the same mould or glove, but the one of which resembles in figure the mirror image of the other. *Ibid.* 313/2 The crystallographic theory of enantiomorph crystals. *Ibid.* 314/1 We now know a considerable number of cases where.. both enantiomorphs have been discovered, and many where only one has as yet been found. **1892** *Science* XX. 89/1 Optical isomers.. may.. be taken as the analogues of enantiomorphous crystals, as of quartz, right-handed and left-handed; the pairs in each case being perfectly equivalent, but not superposable. **1895** STORY-MASKELYNE *Crystallogr.* vi. §150. 169 The configuration of the one tetartohedron will then correspond to that of the other as seen in a mirror. -ence, *suffix.* [a. Fr. *-ence*, ad. L. *-entia*, forming abstr. sbs., usually of quality, rarely of action, on ppl. stems in *-ent-*, e.g. *sapient-em* knowing, *sapient-ia* knowingness, sapience; *audient-em* hearing, *audient-ia* the process of hearing, audience. As the ppl. stem had *-ent-*, *-ant-*, the derivative sbs. had *-entia* (*prūdentia*), *-antia* (*īnfantia*); but all these were levelled in OFr. to *-ance*, in words that survived in popular use, or were formed analogically on the pr. pple. in *-ant*; as *aidance*, *assistance*, *complaisance*, *contenance*, *nuisance*, *parlance*, *séance*. These were sbs. of action or process, the value with which the suffix was retained in Fr. as a living formative. But subsequently other L. words in *-ntia*, which had not survived in the living language, were readopted on the analogy of these, but with *-ence* or *-ance* according to the L. vowel, e.g. *absence*, *clémence*, *diligence*, *élégance*, *présence*, *providence*, *prudence*, *tempérance*, *violence*. These were sbs. of quality or state; all Fr. words in *-ence* are of this class. Both classes were adodpted in ME. in their actual Fr. forms and senses, which they generally still retain; but since 1500, some of those in *-ance* have been altered back to *-ence* after L. All words since adopted from or formed on L., follow L. precedent as to *-ence* or *-ance*. The result is that the modern spelling of individual words, and still more of groups of cogn. words, is uncertain and discordant; cf. assist*ance*, consist*ence*, exist*ence*, resist*ance*, subsist*ence*; attend*ance*, superintend*ence*; ascend*ant*, *-ent*, *-ancy*, *-ency*, condescend*ence*; depend*ant*, *-ent*, *-ance*, *-ence*, independ*ence*; appear*ance*, appar*ent*; pertin*ence*, appurten*ance*. In sense, words in *-nce* are partly nouns of action, as in OFr., partly of state or quality, as in L. The latter idea is more distinctly expressed by the variant *-ncy* (see -Y = *-ie:—-ia*) which has been formed in Eng. as a direct adaptation of L. *-ntia*; see -ENCY, -ANCY.]

encephalization (ɛn,sɛfəlaɪ'zeɪʃən). [f. Gr. ἐγκέφαλ-ος brain + -IZATION.] 1. An evolutionary increase in the complexity or relative size of the brain; a shift of function from non-cortical parts of the brain to the cortex.

1938 J. F. FULTON *Physiol. Nerv. Syst.* p. viii, Owing to greater encephalization, experimental evidence drawn from the primates is more immediately applicable to the human being than that drawn from studies of other mammals. 1940 C. S. SHERRINGTON *Man on his Nature* 310 What is called 'encephalization' is an evolutionary change which is strikingly exemplified in ourselves. It is a shifting of the function in the brain from older and more primitive to newer and more complex parts. 1972 *Science* 19 May 804/1 A major trend in Cenozoic primate evolution has been the progressive neocortical encephalization. 1976 *Sci. Amer.* Jan. 95/2 The step from reptiles to mammals required a certain amount of encephalization (approximately a fourfold increase in relative brain size to transform a reptilian polygon into an archaic mammalian polygon).

2. Special Comb.: **encephalization quotient,** the ratio of the actual size of the brain of an animal to the size that would be expected from the size in other animals, allowing for differences in body weight.

1970 H. J. JERISON in *Science* 11 Dec. 1224/2 We may now define our measure of relative brain size as the *encephalization quotient EQ_i for species *i*, the ratio of its brain size E_i to the expected brain E_e in a living mammal of the same body size P_i. 1975 *Nature* 24 Apr. 687/2 Using Holloway's estimates of endocranial volumes (442 cm^3 for *A. africanus* and 530 cm^3 for *A. robustus*), the encephalisation quotient is 4.0 for *A. africanus* and 4.0 for *A. robustus*. 1981 *Sci. Amer.* Feb. 95/2 Overall, the encephalization quotient of the pterosaur—the ratio of the volume or weight of its brain to that of the brain of an earthbound reptile of the same size—was relatively large.

encephalo- (ɛn'sɛfələʊ, ɛn'kɛfələʊ), comb. form of Gr. ἐγκέφαλος brain, as in **encephalogram** (ɛn'sɛfələʊgræm, ɛn'kɛf-), an X-ray photograph of the brain; **encephalograph** (ɛn'sɛfələʊgrɑ:f, -æf, ɛn'kɛf-), (*a*) = *encephalogram*; (*b*) an instrument for recording the electrical activity of the brain, *electro-encephalograph*; **encepha'lography** [ad. G. *encephalographie* (A. Bingel 1921, in *Fortschr. auf d. Gebiete d. 1. The action of enclosing. **a.** *spec.* The action of surrounding or marking off (land) with a fence or boundary; the action of thus converting pieces of common land into private property. Also *attrib.* in ***Enclosure Act, Commissioner.*** Also *fig.*

An Enclosure Act is a private Act of Parliament authorizing the 'enclosure' of common land in some particular locality. In many cases, however, the land dealt with by these Acts was not 'common' land in an absolute sense, but was private property encumbered with the right of commoning during a few weeks in autumn; and the usual procedure was to give each of the commoners a piece of land in absolute ownership as compensation for his surrender of this right.

-ency, ad. L. *-entia*, the termination of abstract sbs. formed upon pr. pples. (ppl. adjs. or sbs.) in *-ent-* by means of the suffix *-ia* (whence Eng. *-y* in *modesty, fallacy*, etc.: see -Y, -CY). The L. sbs. in *-entia* (like those in *-ia* generally) denoted primarily qualities or states; but some of them came by development of sense to be nouns of action or process, and in late L. and in Romanic the formation of nouns of action became the normal function of the suffix. Consequently the Eng. sbs. in -ENCE (which are adaptations of L. types in *-entia* either through Fr. or according to Fr. analogies) have very frequently the sense of action or process, either in addition to, or to the exclusion of, that of quality or state. The sbs. in *-ency*, on the other hand, being purely English adaptations of the Latin types, have properly only the sense of quality or state, and concrete senses thence developed. As exemplifying this difference of use between the two suffixes, cf. *recurrence* and *currency*, *confluence* and *fluency*, *residence* and *presidency*. When the same word exists in both the *-ence* and the *-ency* forms, the tendency is (where the sense of the verbal etymon permits) to restrict the former to action or process (*i.e.* to connect its meaning rather with that of the vb. than with that of the adj.), while the latter is used to express quality; cf. *coherence* and *coherency*, *persistence* and *persistency*. In a few instances both forms of a word have equally the sense of quality or condition; in most of these cases the one or the other of the forms has become obsolete or archaic; where they are both in current use, the distinction usually is that *-ency* has a more distinct reference to the sense of the related adj. or sb. in *-ent*, considered as the predicate of some particular subject; cf. for example, 'sentience is an attribute of animals' with 'some maintain the sentiency of plants'. See -ANCY.

endlong ('ɛndlɒŋ), *prep.*, *adv.*, and *a.* Forms: 3 **andelong**, 3-4 **endelong**, (4 **endelyng**), 4- **endlong**, 4- *north. dial.* **endlang**. [The early southern ME. *endelong*, f. *ende* END *sb.* + LONG, seems to have been substituted by popular etymology for the preposition *andlang* (see ALONG *prep.*), the first element of this having ceased to be intelligible, while the new compound yielded an identical sense (cf. *on end*, *end on*, ENDAWAY). In purely southern English *endelong* did not long survive, its place being taken by ALONG, the reduced form of the earlier *andlang*. But from 14th c. onwards *endlang*, *endlong* appear (as *prep.* and *adv.*) in northern and midland dialects, where they may be f. ON. *endelangr*, *endlangr* adj. (f. *ende-r* END + *langr* LONG), synonymous with OE. *andlang* adj. 'the whole length of'. In our quots. the adjectival use of *endlong* first occurs in a passage of Caxton's ed. of Trevisa's Higden, where it is substituted for *evelong* (= AVELONGE, oblong), used by Trevisa himself. Subsequently (in 17th c.) the adv. assumed the sense 'on end', 'end foremost or downwards', in accordance with the analogy of words like *headlong*, *sidelong*, where *-long* is a perversion of the OE. suffix *-lunga*. This use still occasionally appears in standard Eng.; the other uses are now peculiar to *Sc.* and northern dialects, except as deliberate archaisms.

Prof. Sievers (*Festgaben für Böhtlingk* 1888) considers that the second element in OE. *andlang* is not identical with LONG *a.*, but is directly from the OTeut. vb. **ling-an*, *lang*, *lung-ano-* to reach, extend. The ON. *endlanger*, Eng. *endlong*, he regards as altered from *andlangr*, OE. *andlang* by popular etymology.]

endorse, indorse (ɛn-, ɪn'dɔːs), *v.* Forms: *α.* 6 endorce, 7– endorse. *β.* 7 indorce, 6– indorse. [Altered form of ME. *endosse* (see ENDOSS), assimilated to the equivalent med.L. *indorsāre* f. *in* upon + *dorsum* back, which was used in law-books in sense 1; cf. the OF. gloss 'indorso, *endorseir*' cited by Godef.

Indorse is the form found in legal and statutory use, and in most political economists; it is also that approved in all American dictionaries; in English use, according to Bithell (*Counting-house Dictionary*, ed. 1893), 'as to the forms *Indorse* and *Endorse*, practice appears to be entirely controlled by the taste of the writer'; but *endorse* is now almost universal in English commercial use. So with the derivatives except *indorsation* (which is now almost exclusively in Scotch use).]

I. To write on the back of something.

1. *trans.* To write on the back of (a document); to inscribe (words) *on* (the back of) a document.

a. In general sense: *e.g.* to inscribe (a document) on the back *with* words indicating the nature of its contents, one's opinion of its value, some extension or limitation of its provisions, etc. **b.** *Comm.* To sign one's name on the back of (a bill, promissory note, or cheque). **c.** *to endorse* (a sum of money) *off*: to write on the back of a bill, etc. a receipt for a portion of its amount.

A bill, cheque, etc. payable 'to order' must be 'endorsed' by the payee before it can be paid. If ***endorsed in blank*** (i.e. without the addition of words making it payable to a particular person), it becomes payable 'to bearer'. Such documents may also be 'endorsed' by a subsequent holder, who thereby becomes responsible for their being paid (hence the *fig.* sense 2). Similarly, a bank note is often 'endorsed' to show that it has passed through the endorser's hands.

enduce, obs. variant of INDUCE.

endue, indue (ɛn-, ɪn'dju:), *v.* Forms: *α.* 5–7 endew, 5– endue; *β.* 5–7, indew, (6 yndue), 5– indue. [ad. OF. *enduire* (also in semi-learned form *induire*), corresp. to Pr. *endurre*, Cat. *induir*, It. *indurre* (cf. the 'learned' forms Sp. *inducir*, Pg. *induzir*, It. *inducere*):—L. *indūcĕre* (see INDUCE), f. *in* into, on + *dūcĕre* to lead, draw. The etymological senses 'lead into', 'draw into', 'lead on', 'draw on', account for the Eng. senses 1–6, which approximately follow the senses of OF. *enduire, induire*. In senses 5–6, however, the word was associated with the nearly synonymous L. *induĕre* to put on (a garment), which it often renders in early translations from Latin. (Perhaps it would not be incorrect to say that the L. *induĕre* was adapted in a form coinciding with that of the verb ad. OF. *enduire*.) Senses 7–9 are of mixed origin: they are partly derived from the fig. use of sense 6 'to clothe' (cf. *invest*); but the forms *endew, indew* in 15th c. (sense 8) are etymologically equivalent to ENDOW (cf. OF. *deu* 1 pers. pres. indic. of *doër* to endow). Hence in 16th and 17th c. the verb *endue* had all the senses of ENDOW in addition to those which it derived from OF. *enduire* and L. *induĕre*. In sense 9 the meanings proceeding from the three sources have so completely coalesced that it is often impossible to say which of them is the most prominent in a particular use of the word.

The form *endue* is now the more common in all the living senses, though some writers employ it and *indue* indiscriminately, while others appropriate the latter to those uses (*esp.* senses 5, 6) which suggest an etymological connexion with L. *induere*. The obs. sense 2, when referred to by mod. writers, has commonly the spelling *endew*.]
